Investment Objective

The Cash Portfolio is a low risk money market fund that aims to deliver returns in excess of the STeFI consistently over time while ensuring capital preservation, stability and liquidity.

The specialist investment managers selected for this portfolio may invest in money-market instruments and cash. Money-market instruments are liquid financial instruments that basically simulate cash, but often give a higher return. The managers are given specific mandates aimed at providing an investment return above the average of money-market portfolios, while maintaining a high degree of liquidity and capital preservation. They may only be exposed to institutions with an A1 (F1) credit rating or better.

The asset composition of the fund is compliant with Regulation 28 of the Pension Funds Act of 1956.

The underlying managers are monitored and reviewed by Sasfin Asset Managers.
