

Investment Objective

The Fund aims to achieve a superior risk-adjusted total return, over a long-term investment horizon, relative to the Morgan Stanley Capital International (MSCI) All Country World Index (ACWI), in US Dollars.

Investment Approach

The Fund will predominantly invest directly in companies listed on major global equity exchanges. It may also invest in other financial and derivative instruments such as money markets and other Funds to assist with efficient money management, to manage the variability of returns, or to obtain diversification in specialist areas not covered by major equity securities.

Risk Profile

Risk	Low	Low-Mod	Mod	Mod-High	High
Term	Less than 1 yr	1-3 years	3+ years	3-5+ years	5+ years

High Risk

- This portfolio has a high exposure to equities and therefore tends to be more volatile than most other portfolios with lesser equity exposure.
- Expected potential long-term returns are greater for portfolios with higher equity exposure but the risk of potential capital losses is greater as well, especially over shorter periods.
- Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks.
- Based on the outlined investment risks, the portfolio is suitable for long term investment horizons.

Information & Disclosures

Risks

Where foreign securities are included in the portfolio there may be additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Certain investments - including those involving futures, options, equity swaps, and other derivatives may give rise to substantial risk and might not be suitable for all investors.

Total Expense Ratio (TER)

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The TER and Transaction Costs cannot be determined accurately because of the short life span of the Fund. Calculations are based on actual data where possible and best estimates where actual data is not available. The TER and Transaction cost calculations were based on figures for the past financial year ended 30 July 2024. Date issue 18 December 2024.
